PAE Applied Technologies Leases over 700,000 s.f. in Romeoville

Romeoville, IL - Liberty Property Trust has signed a lease with PAE Applied Technologies for 723,291 square feet of industrial space at 1070 Windham Parkway in Romeoville. As of May, the company will occupy the entire industrial building.

"With over 1.3 million square feet of new industrial projects last year alone, Romeoville continues to be one of the nation's most attractive locations for development. We are pleased to welcome PAE Applied Technologies to Romeoville and are looking forward to the opening of the facility," said Mayor John Noak.

PAE, a government services firm that supports the United States Postal Service in addition to multiple federal clients, leased the space as part of its most recent contract award to operate the Chicago Mail Transport Equipment Service Center (MTESC) to receive, sort, inspect, package, and redistribute mail transport equipment back to postal service facilities and their community of customers. With 16.5 acres under one roof, the Romeoville MTESC (Mail Transport Equipment Service Center) is the largest service center in the US and PAE currently operates 9 similar facilities across the U.S.
