### Laser Products Celebrates Two Global Milestones

Romeoville, IL – February 20, 2018 – Laser Products Industries (LPI) today announced that the company has reached two important corporate milestones with global sales of its digital measuring systems topping 5,000 lasers and simultaneously reaching a record 3,000 customers.

“Laser Products is thrilled at its rate of expansion,” said Rich Katzenmann, president. “In the past two years we have increased our sales team by 33%, introduced a new, more powerful, more precise laser system and launched our digital solutions into the wood and glass industries. In 2018, we will be aggressively expanding our core business by launching new products and services. Watch for more exciting announcements over the coming months.”

For over two decades, Laser Products has developed and manufactured solutions for the countertop and cabinet industries where it is the workhorse of 80% of the digital fabricators and has won more prestigious awards than any other system in the market. Last month, CEO Dan Louis was inducted into the Kitchen and Bath Hall of Fame in recognition of his lifelong contributions to the industry.

Founded in 1994, Laser Products manufactures laser measuring equipment for the countertop, cabinet, and construction industries. They have sold over 5,000 lasers to more than 3,000 companies in over 35 countries and are used by both the world's leading automated fabricators as well as smaller, manual shops. Laser Products was recognized by Inc. Magazine as a 2017 Inc. 5000 “Fastest Growing Private Companies in America” and the #3 fastest growing private manufacturer in Illinois.
