New Buildings to Attract Business to Romeoville

The Village Board approved the construction for one building and the concept plan for another, both of which promise to bring new business to Romeoville.

A single story, 43,000 square foot office building will be added to the Windham Lakes Business Park. The structure will be constructed on the vacant property near the intersection of Weber Rd. and Windham Pkwy. It will be the largest speculative ground up office building to be constructed within northern Will County in the last few years.

The second structure, near the intersection of Airport Road and South Pinnacle Drive, will house Viga Design, which has outgrown their old facility and has chosen Romeoville as their new place of business. Viga specializes in designing, manufacturing, and installing vinyl graphics for fleets of commercial vehicles.

"It's a good day whenever we can bring more jobs to Romeoville," stated Mayor John Noak. "These new structures will do just that. We've already got a fantastic tenant for one project and anticipate high demand for the office spaces in the other project."

The office building plans to break ground spring 2018 and the Viga project hopes for a summer 2018 start date.
