

This meter is not to be used for deduction from the existing meter.

Second meter needs to be installed prior to the incoming water of the original meter.

Proper installation of the meter is the responsibility of the homeowner.

All water meters and backflow preventers need to be installed and meet all local and state plumbing codes.

Water service may be terminated to the home if the backflow device is not certified annually.

Any questions please call (815)886-1870.
